# 1/General Guide

## ■ Main Key Functions

### [▲] [▼] Review Keys

- Press to scroll through back and forward through the steps of a calculation.
- Pressing [▼] reviews starting from the first step of the calculation, while [▲] reviews from the last step.
- Holding down either key scrolls through the calculation at high speed.

### [AUTO REVIEW] Auto Review Key

- Automatically scrolls through the steps of a calculation from beginning to end.
- Press any key to stop an Auto Review operation.

### [CORRECT] Correct Key

- Used for making corrections to a calculation being viewed using the [▲] and [▼] keys or [AUTO REVIEW] key. See "To edit a calculation" on page 65.

### [TAX RATE TAX+] Tax Plus/Tax Rate Key

- Press to calculate a price-plus-tax or a tax amount.
- Pressing [AC] and then this key to display the currently set tax rate.

### [TAX−] Tax Minus Key

- Press to calculate a price-less-tax or a tax amount.

### [M+] Memory Plus Key

### [M−] Memory Minus Key

### [MRC] Memory Recall / Memory Clear Key

### [F CUT 5/4] Rounding Selector

Specifies the rounding system.

**F** : Floating decimal point system, which displays the value without rounding.

**CUT** : Results are cut off to 2 decimal places.

**5/4** : Results are rounded off (0, 1, 2, 3, 4 are cut off; 5, 6, 7, 8, 9 are rounded up) to 2 decimal places.

- Other key operations are shown under "Example Calculations".

## ■ About the Display

| | |
|---|---|
| ' | : 3-digit separator (apostrophe) |
| "1" ~ "100" | : Step indicator |
| *TAX+* | : Price-plus-tax indicator |
| *TAX-* | : Price-less-tax indicator |
| − | : Negative value indicator |
| *M* | : Independent memory indicator |
| *E* | : Error indicator |
| *K* | : Constant calculation indicator |
| *REV* | : Indicates a Review operation is in progress. |
| *CRT* | : Appears during a Review operation to indicate that corrections can be made in the calculation. |
| *busy* | : Appears during a Review operation to indicate that a correction operation is in progress. |

- In addition to the above, calculation command signs appear in the lower left of the display.

## ■ About Calculation Steps

- The step indicator shows the number of the step currently shown on the display.
- A finalize key operation and the result it produces is also a step. See "Finalizing a Calculation" below.
- Steps continue to be accumulated in Calculation Memory until you press the [AC] key or until 100 steps are accumulated, even if a finalize key is pressed.
- If more than 100 steps are accumulated in Calculation Memory, the Review operation cannot be performed.
- Pressing the [AC] key clears all steps from Calculation Memory and restarts the step count from 1.

## ■ Finalizing a Calculation

Finalizing a calculation means performing a key operation that produces a calculation result. Pressing any of the following keys finalizes a calculation: [=], [%], [M+], [M−], [TAX RATE TAX+], [MR].

## 2/Correcting Input Errors

- To completely clear a value you have just input, press [C].
- To shift a displayed value digit-by-digit to the right, press [▶] until you get to the digit you want to re-input from.
- If you press the wrong arithmetic operation key ([+], [−], [×], [÷]), simply press the correct key before inputting anything else.

### ■ Clearing Calculations

- To clear the calculator completely (except independent memory), press [AC].
- To clear the independent memory only, press [MRC] twice.

### ■ Error Indicator

If the error indicator "E" appears on the display, press [C] to clear the error and continue with the calculation, or [AC] to clear the entire calculation.

## 3/Power Supply

The Two Way Power System of this calculator uses a solar cell, in addition to one CR2032 button type battery. Unlike calculators equipped with a solar cell only, you can use this calculator under virtually any lighting conditions, as long as there is enough light for you to read the display.

### ■ Battery Replacement

> Do not try to replace the battery yourself. Have it replaced by an authorized CASIO dealer or service center.

If the display becomes dim and difficult to read, or if nothing appears on the display when you press [AC] (especially when lighting is dim), you probably need to have the battery replaced.

- A dead battery can leak and damage the calculator if left in the battery compartment for long periods.

### ■ Auto Power Off Function

This calculator is not equipped with an OFF switch. Instead, it switches power off automatically about six minutes after the last key operation is performed. To restore power, press [AC].

- When you press [AC], the independent memory contents are not cleared.
- If the Auto Power Off function turns off power while Review operation is in progress, press [AC] [=] to restore power. Doing so returns to the point you were at before power turned off.

## 4/Important Precautions

- Avoid dropping the calculator and otherwise subjecting it to severe impact.
- Never bend or twist the case.
- Never try to take the calculator apart.
- Wipe the unit with a soft, dry cloth to clean it.
- The contents of these instructions are subject to change without notice.
- CASIO COMPUTER CO., LTD. assumes no responsibility for any loss or claims by third parties which may arise from the use of this product.

## 5/Specifications

**Power Supply** : Two Way Power System, with solar cell and one CR2032 button type battery

**Battery Life** : Approximately 7 years for CR2032 battery (1 hour operation per day)

**Operating Temperature** : 0°C to 40°C (32°F – 104°F)

**Dimensions** : 30.5(H) × 124(W) × 140(D) mm
(1 1/4"H × 4 7/8"W× 5 1/2"D)

**Weight** : Approximately 140 g (4.9 oz) (including the battery)
